DIGAMBARA
ROLLING SHUTTER (OPC) PVT. LTD.

Rolling Shutter Raw Material & Rolling Shutter Manufacturers

YOUR PARTNER IN ROLLING SHUTTER SOLUTIONS.

What We Provide

- Automatic Rolling Shutter
- Motorized Rolling Shutter
- Vertical Rolling Shutter
- Rolling Shutter Bottom
- Rolling Shutter Bracket
- Rolling Shutter Coil
- Rolling Shutter Strip
- Rolling Shutter Spring
- Rolling Shutter Side Guide

DIGAMBARA
ROLLING SHUTTER (OPC) PVT. LTD.
Rolling Shutter Raw Material & Rolling Shutter Manufacturers

ABOUT US

Digambara Rolling Shutter (OPC) Pvt. Ltd. is a trusted supplier and manufacturer of rolling shutter raw materials and rolling shutter solutions in Pune. We deal in a wide range of quality steel coils, sheets, strips and related materials from reputed brands including TATA, JSW, MNS and UTTAM.

With a focus on quality, reliability and customer satisfaction, we provide HR, HRPO, GP, GL, PPGI Coated and CR/CRCC sheet coils, along with various types of strips, coils and sheets for rolling shutter manufacturing. Our aim is to offer dependable materials and efficient solutions to rolling shutter manufacturers, dealers and businesses.

Mission

To supply quality rolling shutter raw materials and reliable shutter solutions, supported by responsive service and transparent business practices.

We strive to meet the needs of manufacturers, dealers and businesses while building lasting customer relationships.

Vision

To become a preferred partner in the rolling shutter industry, recognised for consistent quality, dependable solutions and customer trust.

Your Trusted Partner for Your Need...

Looking for reliable steel materials for your industrial or fabrication requirements?
Digambara Rolling Shutter (OPC) Pvt. Ltd. offers a wide range of steel bars, rods, sheets, aluminium products, and laser cutting services with a focus on quality and competitive pricing.

Rolling Shutter

Automatic Rolling Shutter

Automatic Rolling Shutters are motor-operated shutters designed for convenient, secure and smooth opening and closing of entrances. They are suitable for commercial, industrial and other applications where frequent and easy access is required.

Key Features

- Motorized operation for easy opening and closing
- Smooth and reliable shutter movement
- Strong construction for durability
- Easy-to-use control system
- Suitable for frequent operation
- Provides security and controlled access

Applications

- Shops & Showrooms
- Commercial Buildings
- Warehouses
- Garages
- Factories and Industrial Units
- Offices and Business Premises

Motorized Rolling Shutter

Motorized Rolling Shutters are electrically operated shutters designed for smooth, convenient and secure opening and closing of entrances. Powered by a reliable motor system, they reduce manual effort and are suitable for locations requiring frequent and efficient operation.

Key Features

- Motor-operated opening and closing
- Smooth and reliable shutter movement
- Strong and durable shutter construction
- Easy control and handling
- Suitable for frequent usage
- Enhanced security and controlled access

Applications

- Shops & Showrooms
- Commercial Buildings
- Warehouses
- Garages
- Factories and Industrial Units
- Offices and Business Premises

Rolling Shutter

Vertical Rolling Shutter

Vertical Rolling Shutters are designed to provide secure and space-efficient access for commercial, industrial and other building entrances. The shutter moves vertically along side guides, allowing smooth opening and closing while maintaining a neat and practical appearance.

Key Features

- Smooth vertical operation
- Strong and durable construction
- Space-efficient design
- Provides security and controlled access
- Easy to operate and maintain
- Suitable for different entrance sizes

Applications

- Shops & Showrooms
- Commercial Buildings
- Warehouses
- Parking Areas
- Factories and Industrial Units
- Offices and Business Premises

Rolling Shutter Raw Material

Rolling Shutter Bottom

Rolling Shutter Bottoms are an essential component fitted at the lower edge of a rolling shutter to provide stability, strength and proper alignment. They help the shutter close securely and maintain a firm finish along the bottom edge.

Applications

- Residential Rolling Shutters
- Commercial Shops
- Showrooms
- Warehouses
- Industrial Buildings
- Garages

Key Features

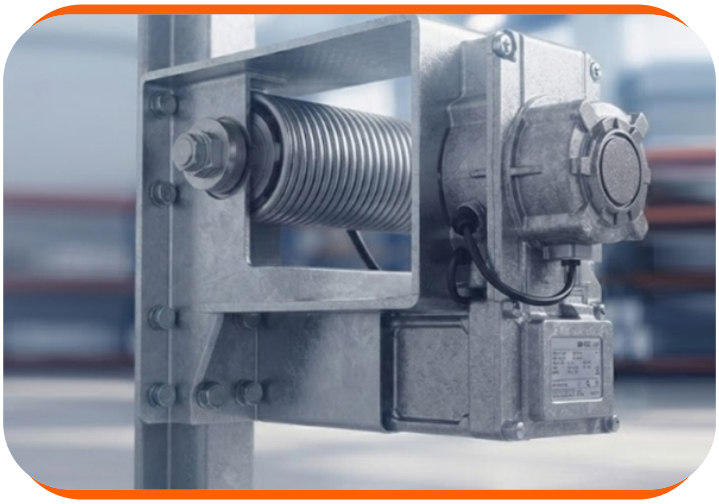

- Strong and durable construction
- Provides stability to the shutter
- Helps maintain proper alignment
- Supports smooth opening and closing
- Designed for long-term usage
- Available in different sizes and profiles

Rolling Shutter Raw Material

Rolling Shutter Bracket

Rolling Shutter Brackets are essential supporting components used to securely hold the shutter assembly, shaft and related mechanisms in place. They provide structural support and help maintain proper alignment for smooth and reliable shutter operation.

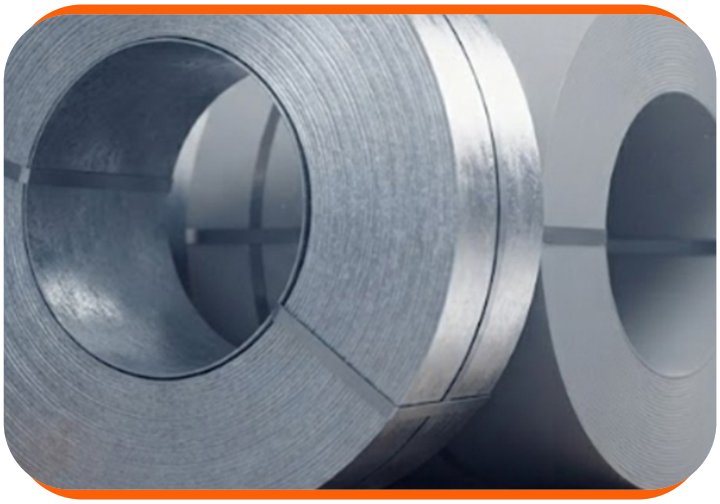

Key Features

- Strong and durable construction
- Provides secure support to the shutter assembly
- Helps maintain proper shaft alignment
- Designed for stable and reliable operation
- Suitable for different rolling shutter systems
- Easy to install and maintain

Applications

- Residential Rolling Shutters
- Shops and Showrooms
- Commercial Buildings
- Warehouses
- Factories & Industrial Units
- Garages

Rolling Shutter Coils

Rolling Shutter Coils are quality steel coils used as raw materials for manufacturing durable and reliable rolling shutter components.

They can be processed into required widths, profiles and strips according to different rolling shutter manufacturing requirements.

Key Features

- Quality steel construction
- Suitable for rolling shutter manufacturing
- Available in different grades and thicknesses
- Can be supplied in various widths and sizes
- Good strength and durability
- Suitable for further processing and profiling

Applications

- Rolling Shutter Manufacturing
- Commercial Shutters
- Industrial Shutters
- Shop Front Shutters
- Warehouse Shutters
- Garage Shutters

Rolling Shutter Raw Material

Rolling Shutter Side Guide

Rolling Shutter Side Guides are essential components installed on both sides of a rolling shutter to guide the shutter curtain during opening and closing.
They help maintain proper alignment, support smooth movement and provide stability during operation.

Key Features

- Strong and durable construction
- Ensures smooth vertical movement
- Maintains proper shutter alignment
- Provides stability during operation
- Helps reduce unwanted movement
- Suitable for different shutter sizes and profiles

Applications

- Shops and Showrooms
- Commercial Buildings
- Warehouses
- Factories and Industrial Units
- Garages
- Offices

Rolling Shutter Spring

Rolling Shutter Springs are essential components used in rolling shutter systems to support smooth and balanced opening and closing.
They help counterbalance the weight of the shutter curtain, making manual operation easier and improving overall shutter performance.

Key Features

- Strong and durable spring construction
- Helps balance shutter weight
- Supports smooth opening and closing
- Reduces manual operating effort
- Suitable for different shutter sizes and weights
- Designed for reliable and consistent performance

Applications

- Shops and Showrooms
- Commercial Buildings
- Warehouses
- Factories & Industrial Units
- Garages
- Offices

Rolling Shutter Raw Material

Rolling Shutter Side Guide

Rolling Shutter Strips are precision-formed metal strips used in the manufacturing of rolling shutter curtains. They are designed to provide strength, flexibility and smooth interlocking between shutter components, ensuring reliable operation and durability.

Key Features

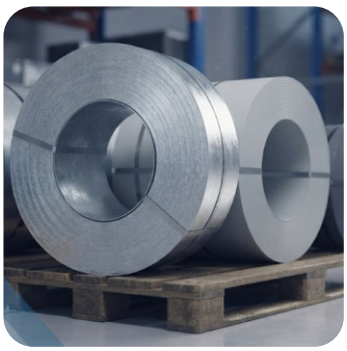

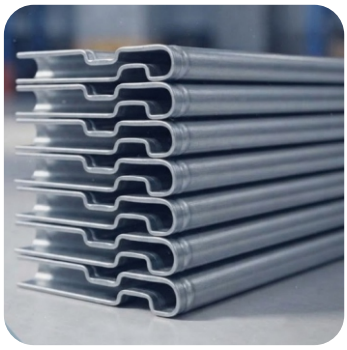

- Strong and durable construction
- Suitable for rolling shutter curtain manufacturing
- Available in different widths and thicknesses
- Smooth and consistent profiles
- Good flexibility and interlocking performance
- Suitable for various shutter designs

Applications

- Rolling Shutter Curtains
- Commercial Shutters
- Industrial Shutters
- Shop Front Shutters
- Warehouse Shutters
- Garage Shutters
